

Green World Path

**Reasons why the world
is turning to Green
World Path...**

Go Green!

Green World Path manufactures a complete line of innovative organic and sustainable products that fertilize, protect, and reduce watering needs for anything that grows. We even produce stackable hydroponic GrowTowers. Our products are utilized all over the world, in all sorts of growing environments like organic and conventional farms, hay, pastures, turf management, golf courses, municipalities, nurseries, lawns, gardens, and greenhouses.

Experience

Over 35 years of experience in organics and the green industry. Consultations are always free.

Extensive Product Line

We offer fertilizers, soil amendments, fungicides, pest and weed controls, natural soil fungi and biologicals.

Superior Formulations

Our organic and beyond products created in our quality controlled laboratory and production facilities.

Cost-Effective

Our custom-blended foliar fertilizers and soil amendments are economical and highly effective.

Certified Organic

Many of our products are, or can be certified organic. Our products are produced with natural ingredients.

Better Results

Increase profit, yield, quality, and shelf life while reducing your input costs.

We offer over 30 products to suit almost any need. Our laboratory and manufacturing facilities can build custom-blended formulations for whatever unique growing situation you may have. With 40 years in the green industry Green World Path has experience to help. Expert advice from our professional sales and research departments are only a phone call or an email away.

With all that Green World Path offers there's never been a better time to go green! Give us a call today.
