

**TOTAL PLUS™**  
**Our Flagship product.**  
**Successfully used on**  
**all crops worldwide**

**We proudly present our Notox Farming™ Product line**  
**PLANT AND SOIL NUTRIENTS AND AMENDMENTS**

**TOTAL Plus™ promotes naturally occurring soil biologicals that contribute to building healthy soil.**

Total Plus™ promotes the naturally occurring soil biologicals that contribute to building balanced soil. Total Plus increases soil conductivity enabling plants to uptake nutrition through deeper rooting systems and increases plants energy from the sun through photosynthesis. Total Plus contains various organic charged carbons, micronutrients and other reproductive ingredient sources derived from land and sea. Total Plus increases the soil CEC (Cation Exchange Capacity) and plants sucrose. Used successfully on large and small farms, greenhouses, lawn, garden, golf courses, controlled cannabis environments, along with specialty crop growers in many parts of the world. Soil or foliage applied.

**HAYGRAZE™ for increased quality, pasture growth, and harvested tonnage.**

To grow high-quality livestock pasture and for harvest stored in bails and silos for haylage. Haylage is very high in available energy and nutrition. Haylage also contains specialty dedicated major and minor nutrients including other natural organic carbons that together produce high-quality pasture and hay. Haygraze increases the total digestible nutrients (TDN). Haygraze also increases the vitamin content and volume

density. Haygraze promotes a deeper and mass root structure for uptake of water and nutrients. Haygraze increases the soil water holding structure to promote crop through periods of less rainfall, even in arid areas. Haygraze promotes faster recovery after each cutting and intense pasturing. Haygraze promotes faster and quality beef cattle weight gain. Increases dairy milk production and test weight. Haygraze is a concentrated liquid produced through GWP's priority intensifying process.

### **MINERAL PLEX™ contains major and minor nano-size micronutrients.**

Mineral Plex contains major, minor, nanosized micronutrients combined with GWP's own exclusive organic Chelation and delivered system for complete utilization by all plants. Increases Brix (sucrose), quality, growth, yields, taste and shelf life. Mineral Plex also provides for higher grain test weights, raises total digestible nutrients (TDN) in pasture and hay crops, livestock feed, increased the shelf life of row crops, fruit, vegetables and all tree crops. Mineral Plex also increases plant energy and their defense system to protect themselves against infestation and insects. Mineral Plex is of the highest quality and concentration available. Naturally utilized when foliar or soil - applied. Mineral Plex increases soil conductivity and Brix (sucrose content) of all plants including a shelf life of all harvested fruits, vegetables, grain crops, including nut tree crops resulting in better taste, healthier vitamin and mineralized food for people and animals. Mineral Plex like all GWP products is bee friendly and only plus effects to soil groundwater, the environment and downstream.

### **HUMACHARGE™ Green World Path 45 years of research**

Humacharge™ There is a great deal more pertaining to types, sources, and production methods of Humic and Phobic Acid. Some even use city processed sewage waste with heavy metals and sold as Humic Acid. Green World Path has taken Humic and Phobic Acid to much higher levels of quality, functions, and performance. Our research first tested many types and sources of Humic and Phobic Acid and claims being made. We discovered the highest, most concentrated, molecular structured Humic Acid in the world. This heavier, denser, arrangement of ions also containing nano type impressions whereby naturally occurring biologicals can be housed for safety, multiplied then slowly released into the existing soil. Humacharge also increases soil conductivity for the highest in CEC (Cation Exchange Capacity) providing for release of energies in a form obtainable by all vegetation. Our production methodology provides for a more condensed and concentrated functional final product. Humacharge reducing the need for applied nutrients allowing the soil to rebuild itself, balancing, while reducing any runoff of nutrients, groundwater contamination and downstream. Humacharge with organic carbons added quickly detoxifies and rebuilds tired low energy soil and renews

soil that has been the victim of the indiscriminate use of commercial fertilizer and toxic chemicals.

Humacharge™ concentrated and only produced by Green World Path is available in liquid form. Foliage or soil-applied or through fertigation.

### **ABOUT APPLICATION RATES**

Green World Path product labels provide application direction. Our products are heavily concentrated to reduce shipping cost and allow for less applied product per acre, greenhouse, or grow container. We believe our customers are our friends and associates and they deserve more than just one suggested application rate and method fits all. This is why we strive to build and keep in close communication, we always want to learn more about your growing enterprise, so we can always provide you with the latest applications rates and frequency your specialty green growing enterprise deserves and not just a one recommendation fits all.

Contact us any time [info@greenworldpath.com](mailto:info@greenworldpath.com)

**YOU SHOULD KNOW** Green World Path products are highly concentrated making them very applied cost effective. Although Green World Path grew rapidly in the agriculture green growing arenas, our products successfully have found their way into other specialty high-value crops. These include tree and row crops that produce high antioxidants, vitamins, oils, hemp, and cannabis intensive growers for legal medical health purposes. We want to be your provider for all your crop nutritionals and plant protection products for any types of crops, you may be growing. We are always available for questions and don't forget that we always learn a great deal from our notox growing associated friends.

## **NOTOX PLANT AND SOIL PROTECTION**

**ECO Plus™ all natural prevents or stop infestations such as fungus, mold in all agriculture crops.**

ECO Plus™ is a totally natural, proprietary multi-link chain polymer with other charged natural values-added allowing plants for their own phyto defense to control and prevent infestations that include fungus, mold in all agriculture crops. Eco Plus when soil

applied increases soil permeability and controls nematodes that attack the root structure. Eco Plus can be soil or foliar applied. Our 35 years of research and successful results. Like all Green World Paths products, ECO Plus is also environmentally friendly and not harmful to bees and other pollinators.

**OUTBOUND™ controls all flying and chewing insects that attack plants. Proprietary fermented essential oils.**

Outbound™ controls flying, chewing and soil-borne insects that harm agriculture plants and those that annoy people and animals. Use as a foliar or soil-applied spray. Also, spray areas for mosquitos and flies where people and animals may congregate. Outbound contains select proprietary essential oils with other natural value-added inputs produced with GWP's energy charged induction system. Outbound is successfully used on all types of agriculture crops. Outbound is also effective on lawns, gardens and golf courses. Outbound can also be spray applied in greenhouses, controlled environments, including livestock and Equine housing and corals. Outbound is very friendly to pollinator bees and the total environment. Outbound's pleasant aroma creates frequencies that are irritating to flying and chewing insects. It disrupts their normal inhalation, entering their cuticle and epidermis affecting their directional ability. Outbound like all GWP products comes from naturally re-producing self-occurring sources.

**CITRUS GROVE RESCUE™ has been found to be effective in destroying the Asian Citrus Psyllid.**

Citrus Grove Rescue™ Citrus Greening was first identified in 1929. It is now destroying the Citrus Industry worldwide. Citrus Greening is spread by a disease infected by an insect named the Asian Citrus Psyllid. Citrus Grove Rescue controls the infestation named CITRUS GREENING. Citrus Grove Rescue works to prevent and the reoccurrence of Citrus Greening. Also, Citrus Grove Rescue enables trees to produce higher levels of sucrose production through photosynthesis. Citrus Grove owners have reported improvement in leaf color, tree health and reduction of citrus greening with only one foliar sprayed application. Citrus Grove Rescue mixed with water, spray applied on foliage is very cost effective. Green World Path has also had other encouraging reports when the product was applied to other crops that were subject to various types of bacterial infections. They include most fruit such as apples, pears, plums, peaches, nut trees, grapes and row crops. Citrus Grove Rescue contains all-natural ingredients derived from healthy extracts of self-defending vegetation. Green World Path is now in its 9th year of commercial trials and Citrus Grove Rescue successful results.

## **GREEN WORLD PATHS' BEST EVER™ PRODUCTS**

**BEST EVER CEDARFOG™ controls mosquitoes, bedbugs, gnats, flies, termites, roaches and other annoying insects.**

CedarFog affects the breathing and cuticle intake of oxygen to flying and chewing insects. CedarFog is extremely effective by using a hand-held electric cold fogger indoor homes, restaurants, commercial building, and hotels. Application in homes and other structures: simply close doors and windows place non-diluted CedarFog in a spray container, fog entire home or other structures. Leave the area treated for 30 minutes, then reenter. No special wiping, cleaning of surfaces and cookware. CedarFog is considered nontoxic. There will be a slight pleasant aroma lasting up to 12 hours. CedarFog's ingredients are derived and harvested from select natural oil-producing plants. Processed through Green World Path's intensified, proprietary methods.

**BEST EVER™ PEOPLE PROTECT** for those that love the outdoors, sportsmen, camping, or just in your backyard. People Protect keeps flying and chewing insects like mosquitos, fly's, gnats, and more away. Just spray or wipe on skin or clothing. Can also spray the general area where people are congregating.

**BEST EVER™ HEAD LICE CONTROL:** Non-toxic and natural ingredients. Spray on a cloth, rub on head and hair. May also be applied one or two hours before showering. Shower within 12 hours after applied. Be sure that all bedding and clothing are washed to help prevent reoccurrence.

**BEST EVER™ PET PROTECT** Controls flying, annoying insects, fleas, and ticks on dogs, cats, and other animals. Just a couple of sprays or apply with a cloth protects your pets. Also, can be sprayed in outdoor pet housing areas and indoor bedding areas.

**BEST EVER™ Products available on a preorder basis for distribution.**

**DID YOU KNOW?** Green World Path products were first developed and tested on numerous farms and ranches over 45 years ago. Green World Path was and still is way ahead of its time and before the words, Going Green was hardly spoken. Green World Paths knowledge came from Mr. Ray Nielsen's research on his own 2,000-acre farms where the learning curve took him from hardcore chemical farming after he witnessed the negative effects of using commercial fertilizers, toxic pest controls. He saw with his own eyes the downgrading of his beautiful, heavy clay loma black soils

actually starting to turn gray. Yes, the advice from manufacturers of these hardcore chemical companies, when they were not working as promoted was just to use more and more of their chemicals. Well, Mr. Nielsen found a better way.

We at GWP are very proud of our products. Technology on and beyond what might be found in the Market Place today. Our products successfully found their way throughout the United States and to many other countries. Yes, and also the small and large farming communities and indoor controlled environments. The people we have met are very precious to us. We strive to help agriculture to Go Green while building sustainability for farmers and communities where ever we and they might be.

**MORE ABOUT RAY** I have traveled the world, met numerous farmers, agriculture, and government leaders, spoken at small and large universities and agriculture events. Had the privilege of being on National TV in several countries and even debated those that wanted to keep farm commodity prices low so they could profit even more at the farmer's expense. I have always stood up for family farms. Helped gather farmers working together in large numbers to sell their crops together at higher prices. Cost of production plus a reasonable profit. I believe the agricultural and food community is the largest business in the world and no country can be sustainable without a large portion of their G N P (Gross National Product) coming from agriculture. Agriculture makes a country financially strong. I have taught organic and notox farming every place I have traveled and still do. The crops and livestock farmers sell, exchanges and moves through several layers of commerce providing more jobs versus any other industry.

I have always enjoyed and still help farmers grow and market their crops grown without toxins for a stronger and better livelihood. Family farms and all of agriculture is what makes a country financially strong and is the heartbeat of local and national commerce.

I'm very happy and proud and sincerely believe my efforts and teaching helped this now enormous **Going Green** a huge international movement that we are now all witnessing. Food is grown without toxins, (Notox Farming™ ), healthier people, healthier animals, and the environment. I will never stop and keep pushing forward for the America Farmer as well as for those in any country and wherever they and I might be for the betterment of all tomorrow, today.

Respectfully,

Ray Nielsen
